One of the biggest questions the experts get asked is "how do I lose my belly fat and get a sixpack?"

Quite often people have tried several things and nothing works—even 100 sit ups a day, 500 calorie diets, running ten miles a day—the list of extremes goes on.

Endless sit-ups just don't work, neither do supplements, starvation diets, nor in many cases even surgery.

There are actually some really simple ways to lose belly fat and get a sixpack, and you can do it in just 10 minutes a day. The secret is quality rather than quantity.

This book includes this quantity in the form of exercises that will help you to get a sixpack as well as a food plan on what foods to avoid and what foods to eat to ensure you get your sixpack faster.
